

# Pine Road

## BUILDING GOALS 2016-2017

### Academic Goal

- To increase student efficacy in writing through strategic planning. Every student will be provided five additional authentic writing opportunities each day. These opportunities will take place across ALL settings as teachers will aim to infuse one authentic writing opportunity daily in each subject area.
- To increase teacher efficacy through strategic professional development via in-service, faculty meetings and peer observation opportunities. Teachers will be provided with regular opportunities to increase their own proficiency with regards to differentiated instruction and co-teaching.

### Affective Goal

- To maintain and improve upon those activities that are distinctively Pine Road.
- To establish and plan for regular student and teacher collaboration across grade levels via the implementation of a school wide Buddy Class program. Each classroom will have a buddy classroom at another grade level. Classrooms will meet regularly in order to establish positive mentoring and learning opportunities for children and to increase collaboration and foster a sense of connectivity for staff members.

### Operational Goal

- To increase efficiency in movement through the hallways via an updated transition schedule.
- To review and modify current paths of egress to ensure efficiency and safety. Each student will clearly understand expectations for behavior during a drill. Our primary responsibility is to ensure the safety of each and every child at Pine Road.
